Decibel (dB) level measurements were taken with a hand-held digital sound level meter (Digital Instruments, model SL-814), calibrated to manufacturer's specifications. A-weighted scale, set at a slow response time capturing the maximum sound level. 0 inches equals the child's ear to the toy. 10 inches equals a child's arm length away from the toy.

Sight & Hearing Association – 1246 University Avenue W., Ste. 226, St. Paul, MN 55104 – 800-992-0424, x11 – kwebb@sightandhearing.org
